Mel@nasa.gov

Topics

- 1) the Astronomy and Physics
Technology Brochure
- 2) the Astronomy and Physics
Enabling Technology Requirements Document
- 3) transfer of the Code R Space Technology program to
Code T.

Spacecraft Technology Program History

Code T plans

- I talked to John Mankins yesterday (Feb. 23, 2004)
 - Contractor review of all Code R Space Technology tasks due to Code T in early March, 2004
 - Code T will then determine what to continue
 - timing of this is not yet known
 - For first time, tech program is in an Office that has responsibility for its own projects.
 - vehicles and missions
 - Code T is not an Institutional Program Office
 - does not have responsibility for Centers.

Request to OS and SEUS

Would like your feedback and advice on the
Enabling Technology Requirements document

- format
- areas of coverage
- depth of coverage
- etc.

How can this document be made most useful to the
Astronomy and Physics community and the groups
we work with on technology development?
